

ACTIVITIES UNIT 2 THE FIVE KINGDOMS

1. Write the name of the five kingdoms?

2 Copy and complete the table in your notebook showing the characteristics of the different kingdoms.

	animals	plants	fungi	protists	bacteria
unicellular
multicellular	✓
make their own food
get food from other sources

3. In which two large groups can animals be classified?

4. What is the difference between these groups?

5. Name the vertebrate groups.

6. Copy and complete the following sentences about different types of vertebrate animals in your notebook. Which two groups are not mentioned?

- ... are covered with scales, breathe through gills and are oviparous.
- ... are covered with fur or hair, breathe with lungs and are viviparous.
- ... are covered with feathers, breathe with lungs and are oviparous.

7. Is it correct to say that invertebrate animals do not have a skeleton?

8. What two groups of plants without flowers do you know?

9. What are spores?

10. Where are the spores in the mosses?

11. Look at the photo and answer the questions in your notebook.

- What kingdom does this organism belong to?
- Is it an angiosperm or a gymnosperm?
- How are the seeds in this organism grouped together?

12. Copy and complete the sentences in your notebook.

- | | | |
|--------------------|---|-------------------------------------|
| Vertebrates... | • | • reproduce using seeds. |
| Invertebrates... | • | • have an internal skeleton. |
| Non-seed plants... | • | • do not have an internal skeleton. |
| Seed plants... | • | • reproduce using spores. |

1 In your notebook, match the words to the letters.

- | | | | |
|-------------|-------|-------------|-----------|
| gymnosperms | mould | vertebrates | yeasts |
| fungi | ferns | mammals | jellyfish |
